Feel Refreshed Like Never Before

Sweet Strawberry and Melon vs. Cooling Mint

**ELEMENTE**
USA

Your teeth are constant companions that need tender care.

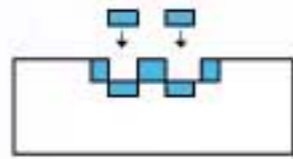

Choose your toothpaste wisely. It is the cleaning product you come into closest contact with.

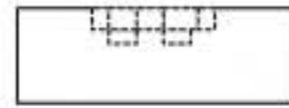

Tartar buildup in crevices on tooth surface leads to cavities.

Unique formula cleans away tartar without damaging enamel.

Crevices are filled with hydroxyapatite.

With crevices filled, teeth look naturally whitened and tooth decay is prevented.

There is much concern among scientists and in the media regarding long-time common toothpaste ingredients such as fluoride, triclosan and sodium lauryl sulfate (SLS), showing the importance of toothpaste safety.

Wondering which toothpaste to choose? **Happy Toothpaste** and **Bright & White Toothpaste**, manufactured under strict conditions, have no harmful ingredients. They provide the most reliable protection for the whole family. Enjoy good oral health with their safer, anti-bacterial formulas.

What's more, **Happy Toothpaste** and **Bright & White Toothpaste** contain soluble micro-particles and Oxyginberry Complex to strengthen and whiten teeth. They help to fight dental plaque, maintain oral hygiene and fresh breath, and prevent dental problems, providing all-day, all-rounded oral protection.

Brush with Peace of Mind

Ingredients

Hydroxyapatite

- Repairs teeth.
- Removes tartar.
- Absorbs odors from bad breath and tartar.
- Good bio-compatibility.

o-cymen-5-ol
